

## ROLE PROFILE

# Interim Senior Finance Manager — Global Media Technology Business, London / Hybrid

Bhargava Raju Dommaraju · Interim Senior Finance Manager, Commercial Finance and Business Partnering

20+ years in finance, 13 as an interim

CA and CIMA qualified

PRINCE2 Practitioner

Immediately available

London / hybrid · 6-month contract

## WHY THIS BRIEF

The brief asks for a qualified Senior Finance Manager who can partner commercial and operational stakeholders, own forecasting, budgeting and planning, and turn analysis into performance insight while a transformation programme runs across multiple international markets. Three engagements answer that directly. At Walgreens Boots Alliance I held the Senior Finance Manager title and later Financial Controller / Head of Finance for the CDF International Division, business partnering cost centres of around £40 million a year across 45+ entities through the \$6 billion Alliance Healthcare divestment. At Commercial Metals Company I sat on the UK management team, partnered production, supply chain and sales, and stepped up to Commercial Director on an interim basis for five months. At Pepper Money, a PE-backed business, I modernised the finance function with AI agents and automation. Media sector work and bid support both sit in my record but are lighter than the rest, and are stated below rather than written round.

## REQUIREMENT BY REQUIREMENT

| WHAT THE BRIEF ASKS FOR                                                | EVIDENCE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                |
|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Qualified accountant, 5+ years PQE</b>                              | Chartered Accountant (CA, ICAI India — Rank Holder, first-time passes, 2007) and CIMA qualified (2008, all managerial and strategic papers at first attempt). PRINCE2 Practitioner. 20+ years in finance, 13 of them as an interim — well beyond the 5 years PQE threshold.                                                                                                                                                                                                                                                                                                              | <b>MATCH</b>   |
| <b>Strong commercial finance and business partnering experience</b>    | At WBA I business partnered the CDF and Project cost centres, around <b>£40 million a year</b> , and partnered divisional leadership on cost risks and opportunities through the executive planning challenge. I was one of the management signing authorities for project investment papers under divisional DOA, and partnered the restructuring of a <b>£100 million</b> IT programme. At CMC I sat on the UK management team, partnered production, supply chain and sales, and changed the costing method — which reset selling prices and lifted volumes by more than <b>15%</b> . | <b>MATCH</b>   |
| <b>Forecasting, budgeting and financial planning expertise</b>         | At WBA I was accountable for executing the budget planning and consolidation process, the consolidated management reporting suite, capex and cash flow forecasts and treasury management, and built a long-term multi-currency cash flow forecast that reduced interest and FX exposure. I led the TM1 / Planning Analytics implementation for the international division end to end, cutting planning and management reporting cycles by <b>~60%</b> . At CMC I owned the budget planning process and the monthly management reporting suite.                                           | <b>MATCH</b>   |
| <b>Commercial analysis and performance insight</b>                     | Built and owned the consolidated management reporting suite at WBA, partnering C-suite to deliver strategic insight, and designed scalable financial models supporting major transformation decisions. Key controllership stakeholder on a <b>£300 million</b> IT outsourcing project. Nine simplification initiatives taken from idea to executed after securing senior sponsorship, with <b>4</b> new Group SOPs rolled out in 7 months.                                                                                                                                               | <b>MATCH</b>   |
| <b>Bid support</b>                                                     | I supported bids at Larsen & Toubro as Assistant Finance Manager between 2008 and 2010 — that is genuine bid experience, but it sits early in my career. The more recent comparable work is investment case appraisal and funding submissions: signing authority on divisional investment papers at WBA, and a successful Welsh Government capital grant application at CMC that funded a new line of business and grew it by <b>20%</b> . Worth a short conversation about what bid support means on this engagement.                                                                   | <b>PARTIAL</b> |
| <b>Experience working with operational and commercial stakeholders</b> | At CMC, constant working contact with production, supply chain and sales as part of the management team. At WBA, partnering divisional leadership, procurement and IT through the CDF transition into Boots, including contract novation with vendors. At GSK, coordinating finance heads across approximately <b>45 countries</b> to agree and clear intercompany positions.                                                                                                                                                                                                            | <b>MATCH</b>   |
| <b>Transformation programme across multiple international markets</b>  | WBA CDF International Division — led the transition of the division into Boots following the <b>\$6 billion</b> Alliance Healthcare divestment, ran the TSA with Cencora, redesigned the cost-allocation model to cut intercompany transaction volumes by <b>~60%</b> across <b>45+</b> entities, and led SAP ECC to S/4HANA preparation across all modules. Key member of the Group finance transformation team on cost optimisation targeting <b>£1 billion</b> of savings.                                                                                                            | <b>MATCH</b>   |
| <b>PE-backed and / or Tech / Media sector experience</b>               | PE-backed: yes. Pepper Money, where I ran finance transformation and prepared reporting integrity for PE acquisition and group carve-out; and Paratus AMC, where I supported the CFO through a PE exit. Media: a part-time consulting engagement with Lyonsdown, a media company, across 2015 and 2016 — limited in scope, but the sector is not new to me. My main sectors are pharma (GSK), retail and healthcare distribution (WBA), steel manufacturing and distribution (CMC), financial services (Pepper Money, Paratus AMC) and automotive (Delphi).                              | <b>PARTIAL</b> |

## FOUR PIECES OF EVIDENCE

### Commercial finance and business partnering

Walgreens Boots Alliance and CMC · Senior Finance Manager, FC / Head of Finance, Controller · 2011–2024

- **~£40m per annum** of CDF and Project cost centres business partnered at WBA
- **15%+** volume increase at CMC after a costing method change reset selling prices
- **5 months** as interim Commercial Director at CMC, reporting to the UK Managing Director

### Planning, forecasting and FP&A systems

Walgreens Boots Alliance · TM1 / Planning Analytics · 2019–2024

- **~60%** faster planning and management reporting cycles after the TM1 implementation
- Full lifecycle ownership — As-Is mapping, requirements, driver-based design, build, stabilisation and super-user handover
- Long-term multi-currency cash flow forecast built, reducing interest and FX exposure

### AI-enabled modernisation

Pepper Money · Copilot Studio, Power Automate, Power BI

- **~120 hours per month** of manual effort removed across P2P, R2R, reconciliations and month-end close
- **60%** processing time reduction from re-engineered SAP Concur and Technology One workflows
- AI reporting and analysis agents built alongside Power BI for faster, more consistent management insight

### Systems

Implemented, led or owned

- SAP ECC and S/4HANA, BI, AO and BPC · Oracle Financials · MS Dynamics GP · TM1 / Planning Analytics · Vena
- Super user: SAP Concur, Technology One, Cognos, FloQast, Hyperion
- Power BI, SQL, RPA tools, Trintech, BlackLine

## ONE THING WORTH SAYING PLAINLY

Two items in the spec are covered, but lightly. My media sector exposure is a part-time consulting engagement with Lyonsdown across 2015 and 2016. My bid support experience is from Larsen & Toubro between 2008 and 2010. Both are real; neither is recent and central the way the rest of my record is. I would rather say that than let either look bigger than it is.

The rest of the brief I have done at scale: commercial partnering of operational and commercial stakeholders, ownership of budgeting, forecasting and planning cycles, performance reporting built for C-suite decision-making, and thirteen years of walking into transformation programmes across multi-entity international groups and being useful inside the first month. Pepper Money and Paratus AMC cover the PE-backed side.

If deep in-sector media experience is the deciding factor, that is a fair call to make. If the priority is someone who can partner the business and hold the planning cycle together while the programme runs across markets, I would welcome the conversation.

## CONTACT

CA and CIMA qualified, PRINCE2 Practitioner, immediately available. Happy to talk through the commercial partnering scope, the planning cycle and how the transformation programme is being run across markets on a call.
